

**a)** Name of data base:- **italent**

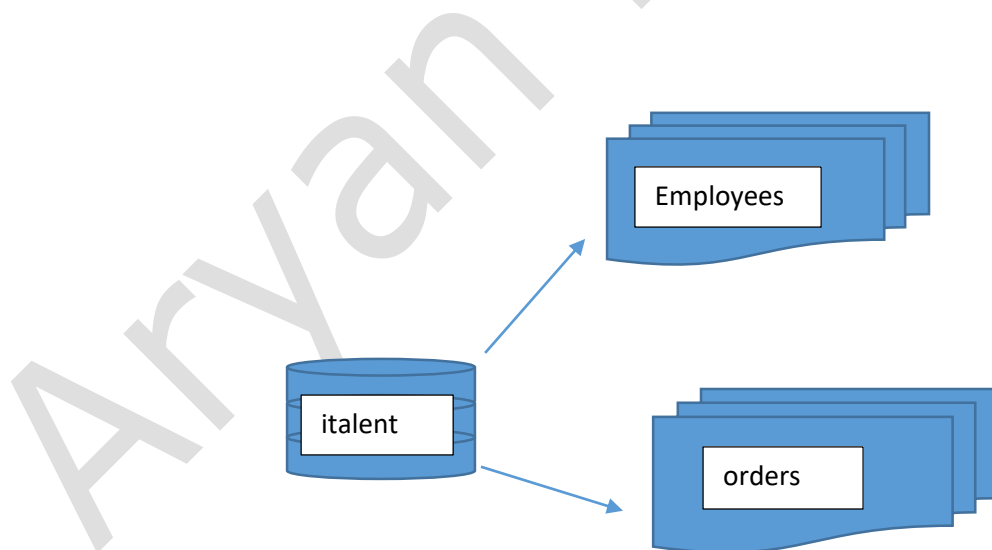

**b)** Inside italent database I have created two table, one for user and other one for orders.

Name of user table is **employees** and

Name of order table is **orders** as above image indicates.

**c)** Database is present inside **database backup** folder. Please import it inside **italent database** after creating italent database.

**d)** Copy and paste italent folder in your root directory of **xampp/wampp/lamp server**

Note:- Please make sure internet connection is ON. As I used CDN links so internet is compulsory for it.

Regards
